

You know where, we know how

42 truckloads, police escorts, tandem lifting and a tight time schedule

2.256,32 cbm, including mobile crane, pulling heads and trailers have been transported from Spain to a wind energy park in northern Germany.

After arrival of the fully chartered vessel at Hamburg port, Conceptum Logistics Hamburg took care of a personally supervised discharge including tandem lifting of the heavy loads.

On-carriage to the final site had to be executed within a set time frame of 5 days only. It took 42 full truck loads and special police escorts for the heavy lift pieces.
