

You know where, we know how

A 368 metric tons piece with 5,700 cbm in one lot

Conceptum Logistics Hamburg operated over 24,000 frtons in one go from China and Taiwan to Saudi Arabia - another milestone in our petrochemical expertise.

As enquiry/fixation and first laycan were just less than 10 days apart, the cargo was very time sensitive.

However thanks to our local colleagues who personally supervised and monitored the trucking, delivery and loading operations, all was running well and to our customer's full satisfaction.
