

You know where, we know how

### A triple crane operation for a heavy weight in Taiwan

As final delivery of a 23,363 frts petrochemical project with piece weights up to 500 ts Conceptum Logistics handled a 479 ts reactor with 834 cbm plus accessories from Dalian to Taipei.

Due to size, weight and route, the transport included unloading onto barge, a triple lift operation at destination and on-carriage up to the site in Taiwan.
