

You know where, we know how

## Conceptum Logistics Finland moves cable reels by fully chartered coaster to Denmark

Our Finnish colleagues handled a transport of cable rolls with a total of 1,676 cbm, measurements of 4.6 x 2.64 x 4.6 m and piece weights of 26.4 ts by fully chartered coaster from Kantvik, Finland to Esbjerg, Denmark.

The challenge was that the cargo could not be lashed with chains or straps, as welding was prohibited on board.

Our Finnish colleague was at the port to supervise the loading operation.
