

You know where, we know how

## One of the biggest single breakbulk-shipments handled in the port of Hamburg this year

Conceptum Logistics successfully shipped an MDF-Plant with around 9,000 frts plus 400 x 40' containers from Germany, Holland, Turkey and China to Itapoa/Brazil.

Instead of moving the b/b-cargo on conventional carrier or containerized on flat racks as with the previous project, we brought a RoRo-vessel from Hamburg into Itapoa for the first time as inducement call.

Itapoa is a pure FCL-port and it was quite a novelty to handle a RoRo-vessel without fail, which required a lot of communication with the carrier and his Brazilian agent, the stevedore, the Port Authority of Itapoa and Brazilian customs in order to make it happen.

Our lady has been guided into the port without any waiting time and has been discharged within 12 hours with dozens of mafi-trailers and trucks squirming on the pier.

The second lot out of Hamburg added up to a total of 15,500 frts break bulk and container combined in a ConRoRo sailing, one of the biggest single breakbulk-shipments handled in the port of Hamburg this year.
