

You know where, we know how

Premium logistics for extraordinary freight

With Hamburg as 24/7 control tower and our team at the ports of loading and unloading, Conceptum Logistics moved an Oil & Gas project from Germany via Austria and Romania to Oman.

By barge and platform the heavy lift and OOG cargo, with piece weights up to 310 ts and dims up to 1,548 cbm, has been moved via Linz to Constanta, already awaited by our colleague from Hamburg taking care of a trouble free loading process.

After the 4,350 cbm have been loaded directly onto vessel the next stop was Port of Sohar in Oman.

Also here Conceptum already waited to supervise and coordinate the un-loading process, customs clearance and on-carriage of this extraordinary freight up to the final site in Sohar by truck, police escorts and special traffic management.
